The data gathering period for the study was from October 9 to 16, 2021.

Convenience sampling was utilized as the sampling scheme. Specifically, the survey, hosted on SurveyMonkey, was publicized on Facebook for respondents to voluntarily answer. This was supplemented by efforts of reaching out via email and SMS to our existing respondent database (who had previously consented to being contacted for future studies). This means the results of the survey **shall not be construed as representative of the Filipino population, and is skewed heavily towards Facebook as the source of respondents.**
